

To Whom it may Concern,
I have been an xm radio listener since it has been available and find that I don't even listen to am, fm, or even cd's anymore. I find the choices that satellite radio offer are much more diverse, especially in a smaller town which I live. I urge you to reject Petition 04-160. I can listen to what I want in my car or at home. Perhaps next the NAB will try to stop me from keeping my cd's in my car?
